Suicide Prevention

It's Every Body's Business!

😊 Vote 1 😊

WANTED!

No.1 Antidote to Suicide!

What do Rabbits and Smileys have in common? 😊😊

They can both multiply very rapidly!

What's a Smiley got in common with the Asian FLU?

They're BOTH highly contagious!!

Now in doing some extensive research for this Advert, **burrowing** deeply into the **warrens** of the internet, I managed to **unearth** :- Sir Isaac Newton's little known and long forgotten First Law for Reproduction of the Smiley ...

Laughter! It's the closest distance - between 2 people!!

Not only is our world a happier place to live in when there are Smileys around, but happy people are much less likely to Suicide! And the best way to generate Smileys is to have 2 people together - another powerful antidote to Suicide in itself! Our Communities always have happy people in them, we just need **MORE** - because happiness and positive thinking 'rubs off'.

I 'spotlight' 3 such people. Bruce Hancock from PIRSA. When talking to Bruce on the phone - it's like the sun is coming out of your earpiece! Ian Ross, my neighbour had his **first** triple bypass at age 56, and is still going strong with a twinkle in his eye at 85. And my dear Uncle Bill who flew '*whispering death*' Beaufighter Bombers during WW2. Despite this - he lived another 66 years, just made it to 100, largely due to his positive attitude and sense of humour!

Happy people make 'happy places' like our homes, businesses, pubs and clubs! An excellent example is the Cafe Nova in Gawler where **Happiness and Laughter is always 'on the menu', and always 'on the house!'** This doesn't happen 'by accident', it's an 'ethic' in the Management and ALL the Staff!

Remember the reverse of all of this is true. Avoid depressed, unhappy places/spaces and while being caring/respectful to anyone around you who may be depressed - spend plenty of time around sunny, positive people!

Written by Tim Barritt, **funded by a caring Barossa Sponsor.**
